ANNUAL REPORT

OF THE

MEDICAL OFFICER OF HEALTH

FOR THE YEAR

1964

BY

FRANK COCKCROFT

M.A., L.R.C.P., M.R.C.S., D.P.H.

W. Hignett & Son, Ltd., Littlehampton.

LITTLEHAMPTON URBAN DISTRICT COUNCIL.

Council Offices,
Manor House,
Littlehampton.

May, 1965.

Ladies and Gentlemen,

I have pleasure in presenting my Annual Report for 1964.

The Registrar General has shown that there was an increase in population of 840 (5.17%) over his estimate for 1963. The natural increase from excess births over deaths was 60, so that newcomers to the town must have accounted for an increase of 780 persons. There were 20 fewer deaths and 8 fewer births than the previous year and because of the increased population the death and birth rates fell appreciably. The corrected death rate was significantly lower than the rate for England and Wales, which suggests, of course, that Littlehampton is a healthier than average place in which to live.

I find it very regrettable that I am not able to record any visible progress in the provision of satisfactory conveniences on the West Beach.

Some of the houseboats on the west bank of the river are not only unsightly, but unsatisfactory as units of living accommodation. The disposal of sewage and waste water adds to the pollution of the river and banks. The method of disposal leaves much to be desired. Their water supply is from stand-pipes. Connections with rubber or plastic hoses to the houseboats pass, in some cases, through dirty looking mud, but all samples of water taken from the houseboats have been found fit for drinking.

More and more districts in the world are having the advantage of fluoridation of their water supplies. Some have had it for very many years with not the slightest sign of harmful effects but with great benefit to the dentition of the children. There does not seem any chance of this beneficial measure being carried out in Sussex in the near future and so children in this town, as in others of West Sussex, will continue to have more dental decay than they need.

There is much controversy today about sewage being discharged into the sea. I am satisfied that a correctly placed outfall in the open sea is not going to cause any health hazard, but I personally feel all sewage should be treated before discharge into the sea so that there is no aesthetic unpleasantness. A national policy is desirable and perhaps the answer may be in having regional sewage boards just as we now have Water Boards.

Then, maybe, we can return to the land all the organic matter which we are discharging into the sea. There are many who wonder whether a penny saved today in choosing a sea outfall does not mean a pound spent tomorrow.

I know that quite a number of Littlehampton youngsters are already tobacco addicts and as a result many of them will suffer ill health in later life. An even more serious addiction is becoming a very real danger to health of teenagers. This is the taking of drugs. I do not know to what extent, if any, this is carried out in Littlehampton, but I must warn everyone that the results of drug taking are often tragedy and almost always harmful. I do not, of course, refer to drugs taken under doctors' orders.

I wish to express my thanks to Mr. Rae for his help in compiling information for this report and to the other Officers of the Council and the County Medical Officer for supplying other details. In particular, I should like to express my sincere gratitude to Miss Woodroffe, my secretary, who has been engaged in assembling the Medical Officer's reports for thirty-three years and has greatly simplified the task of the Medical Officer of Health.

I am, Ladies and Gentleman,

Your obedient Servant,

FRANK COCKCROFT,

Medical Officer of Health.

To the Chairman and Members of the
Littlehampton Urban District Council.

SECTION A

GENERAL STATISTICS.

Area (acres), 2,915.

Resident Population (1964), estimated by Registrar General, 17,060.

Population (1961), Census, 15,647.

Rateable Value (1964), £756,589.

Sum represented by 1d. Rate, £3,018.

No. of inhabited houses end of 1964 according to Rate Book, 5,401.

EXTRACTS FROM VITAL STATISTICS OF THE YEAR

	Total	M.	F.	
Total live				Rate per 1,000 of estimated
Births	285	142	143	resident population 16.7
				Corrected Rate 18.9.

SECTION B

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA

Chairman of the Public Health Committee
Councillor R. LINDSAY

Medical Officer of Health :
FRANK COCKCROFT, M.A. , L.R.C.P. , M.R.C.S. , D.P.H.

Chief Public Health Inspector :
Mr. W. P. S. RAE, M.A.P.H.I (1), (2) and (3).

Public Health Inspector :
Mr. F. BRYNING, M.A.P.H.I (1).

- (1) Certificate of the Public Health Inspectors' Education Board.
- (2) Certificate for Inspection of Meat and Other Foods.
- (3) Smoke Inspector's Diploma of the Royal Society of Health.

The Medical Officer of Health is also Medical Officer of Health for the Worthing Rural District and Assistant County Medical Officer.

The Port Health District work is carried out by the Medical Officer of Health and the Public Health Inspector.

Services Provided by West Sussex County Council.

(a) Nursing.

Seven General District Nurses, 2 Midwives, and 3 Health Visitors are employed in the area. Lists showing their names and addresses may be seen at County Libraries, Town Halls or Offices of local District Councils, and the County Health Department, County Hall, Chichester.

(b) Maternity and Child Welfare :-

Clinics are held as follows -

Maternity and Child Welfare	Littlehampton Health Clinic	Mondays and Thursdays 2.30 p. m. (weekly).
Ante-Natal and Post-Natal	ditto	Tuesdays 10 a. m. (Weekly).
ditto (Midwives' Session)	ditto	Fridays 2 p. m. (Weekly).

The following figures have been provided by the County Medical Officer showing the attendances at the Maternity and Child Welfare Clinics :

A N T E - N A T A L		P O S T - N A T A L	
No. of Women	Total	No. of Women	Total
attending	attendances	attending	attendances
300	1,640	109	116

CHILD WELFARE :

No. of Children	Total attendances
attending	5,797
685	

A Family Planning Clinic is provided by the County Council at Shoreham Health Clinic and the Family Planning Association operates one at the Health Clinic at Bognor Regis and Worthing.

(c) School Clinics

Minor Ailments)	Littlehampton Health Clinic
Eye)	
Orthopaedic)	
Physiotherapy)	
Speech Therapy)	
Dental)	

Expectant and nursing mothers may also receive free treatment at the Dental Clinics. Dental anaesthetics were given by the Medical Officer when required, but arrangements have now been made for an Anaesthetist from the Regional Hospital Board to come and give the anaesthetics and be paid on a sessional basis.

(d) Ambulance Service.

The County Council operate the Ambulance Service (including the hospital car service) in the County. Requests are made through the doctor or hospital attending the patient, or through the Police or public in case of accidents or other emergencies.

(e) Health Education.

The County Council is responsible for this service, a great amount of which is done by the Health Visitors both in the homes and at the Clinics.

(f) Mental Health.

The County Council is responsible for a domiciliary mental welfare service, but institutional and out-patient treatment is provided by the Regional Hospital Board.

(g) Home Help Service.

The County Council is responsible for this service.

Hospital and Specialist Services.

A comprehensive hospital and specialist service is provided by the Regional Hospital Board. Hospital accommodation of a private nature is available in certain circumstances, subject to appropriate charges.

Mass Radiography Units are stationed at Portsmouth and Brighton. A Mobile Unit also based at Portsmouth covers this area and visits Littlehampton every Wednesday for cases referred by General Practitioners.

Chest Clinics are held at Worthing Hospital and at Aldingbourne Chest Hospital, both of which are available to the residents of Littlehampton.

Venereal Disease.

Residents may attend Clinics at Worthing Hospital, St. Richard's Hospital, Chichester, the Royal Sussex County Hospital, Brighton, or St. Mary's Hospital, Portsmouth.

Nursing Homes.

There are three private nursing homes in the district.

General Medical and Dental Service.

Local arrangements for these services are organised through the National Health Service Executive Council for West Sussex, 175, Broyle Road, Chichester.

Meals-on-Wheels.

Meals are provided and delivered to old people in their homes by the W. V. S. on Tuesdays and Thursdays, approximately 210 meals a week being delivered at a cost of 1/6 per meal to the consumer.

Laboratory Facilities.

The following Laboratories are available for the examination of specimens :-

- The Public Health Laboratory, Brighton.
- The Worthing Hospital Laboratory.
- The Public Analyst's Laboratory, Lewes.

Mortuary.

The Littlehampton Urban District Council provide a Mortuary which serves the Littlehampton area.

Persons in Need of Care and Attention.

It was not necessary to take any action during the year under Section 47 of the National Assistance Act, 1947.

Medical Examination of Staff.

Twenty examinations were carried out for Superannuation purposes.

SECTION C

SANITARY CIRCUMSTANCES OF THE AREA.

Water.

Worthing Corporation supply the town with water from deep wells in the Downs at Burpham. Their Water Engineer has kept me informed about the quality of the supply by sending me reports of chemical analyses, weekly bacteriological analyses, and the results of any other tests carried out. The water is plentiful in supply, hard, but chemically satisfactory. Bacteriologically, the raw water was satisfactory for the first five months but then became progressively polluted with faecal coliform organisms. This is almost certainly related to the level of the subterranean water table. When this became low, polluted water from the river has been mixed with the supply, and in addition it may be that leaking cesspools in the village of Burpham may have added their share of pollution. Modern chlorination treatment is very effective and the treated water in distribution was perfectly safe. Even so, all those interested in the water supply would prefer to see this pollution removed from the river and the village of Burpham sewered and the sewage removed from the collecting grounds of Burpham Water Undertaking.

The following are the results received from Worthing of samples of water examined in 1964 :-

	Total	Satis.	Unsatis.
At Burpham:			
Bacteriological - Raw	116	47	69
- Treated	89	87	2
Chemical	82	82	-
(Average hardness 228 parts per million)			

From distribution points
in Littlehampton :-

Bacteriological	39	39	-
Chemical	22	22	-

Your Health Department took 37 samples of mains water including 20 from house-boats. In two cases the results were suspicious. On following up these samples, it was found that the supply was from a cistern, and subsequent samples from the rising main were satisfactory.

All four samples taken from wells were satisfactory.

Only nine houses are not supplied with water from public mains.

Drainage and Sewerage.

The extensions to the sewerage system of the area have been 273 yards of soil sewers and 172 yards of combined sewers.

The Council is considering improving their sewage disposal system. Consultations are going on with their Consultant Engineers and the neighbouring authority of Worthing Rural District Council in order to arrive at the best practical means of improving present conditions, which consist of discharging untreated sewage through tanks into the river at a point about 80 yards beyond the wooden pier on the eastern bank.

There are 61 properties on cesspool drainage.

Public Conveniences.

The Council maintain public conveniences for ladies and gentlemen at the following places:- Near the Council Offices; the Pier; Maltravers Recreation Ground; Norfolk Road; Mewsbrook Park; North Street; Worthing Road and Horsham Road Cemetery. In addition, there are male conveniences near the Bridge and off the High Street, and a ladies' convenience in Beach Road. This makes a total of 19 conveniences in all, 9 for males and 10 for females.

The hut containing pail closets was still provided on the West Beach. Maintenance was carried out as efficiently as possible, but the facilities were both inadequate and unsatisfactory.

House Refuse.

Disposal was by means of controlled tipping on a site in Worthing Road.

Swimming Baths.

Three swimming baths in the district were sampled. Nine samples were taken and six were found to be satisfactory.

Houseboats.

Thirty-two houseboats stationed on the west bank of the River Arun were inspected. Some were found to be in poor repair, badly equipped and judged by Housing Act standards were unfit for human habitation. The Housing Act cannot, of course, be applied to these dwellings and as a first step the Council asked the owner of the moorings to co-operate by not allowing additional houseboats to be moored and not re-letting existing berths occupied by substandard boats.

Schools.

There are seven Primary and Secondary Schools in the district, but one school had to operate in two separate premises.

There are also six private schools.

The sanitary arrangements at Lyminster School are, by modern standards, unsatisfactory. At the other schools conditions were satisfactory.

Delegation of Powers.

Delegated powers were sought and obtained by the Public Health Committee under the following sections to minimise the delay in cases where it was necessary to institute statutory action :

Public Health Act, 1936. Sections 24, 45, 46, 50, 75 and 93.

Public Health Act, 1961. Sections 17, 18 and 26.

National Assistance Act, 1948. Section 47.

Offices, Shops & Railway Premises Act, 1964.

This Act has finally reached the Statute Book some 13 years after the report of the Gowers Committee which was set up to enquire into the conditions of safety, health and welfare for people working in these premises. The duties under the Act are shared by the Local Authority, the Local Fire Authority and the Factory Inspector. Occupiers were required to apply for registration and up to the end of the year 184 applications had been received, but it is apparent that the full total will be much higher than this.

Premises have to be inspected to ensure that they comply with 21 specific requirements including such matters as the safety of machines, the fencing of moving parts, and the enquiry into accidents caused at work, which is a completely new field for Local Authority Inspectors.

The detailed requirements are laid down in sets of Regulations and Orders and the following have already been made :-

The Washing Facilities Regulations, 1964.

The Sanitary Conveniences Regulations, 1964.

The First Aid Order, 1964.

The Prescribed Dangerous Machines Order, 1964.

The Annual Reports Order, 1964.

The Offices at Building Operations, etc. (First Aid) Regulations 1964.

The initial inspections are proceeding smoothly and the advance publicity given to the Act by the Ministry of Labour is providing of value, as most occupiers are aware of the essential requirements prior to the inspection. The Regulations are of such a precise and detailed nature that the inspection of even a small office or shop can be a lengthy operation and a decrease in the number of routine inspections carried out under other legislation is inevitable.

No. of premises registered at the end of the year	184
No. of Inspections carried out	30
No. of cases in which defects were found -	
(a) Defective or insufficient sanitary accommodation	12
(b) Lack of thermometers	15
(c) Defective or insufficient washing accommodation	6
(d) Insufficient first aid boxes	6
(e) Insufficient seating accommodation for employees	8
(f) Overcrowding	2
(g) Lack of means of providing a reasonable temperature	3
(h) Defective condition of floors, passages and stairs	2
(i) Insufficient accommodation for clothing	1

Common Lodging Houses.

There are no common lodging houses registered in the district.

Camping and Caravan Sites.

Thirteen site licences have been issued under the provisions of the Caravan Sites and Control of Development Act, 1960. Six of the sites have been licensed without time limitation and seven subject to time limits varying with individual sites. All the sites are for permanent caravans. There are no facilities for mobile caravans.

One site for 210 tents alongside the River Arun was licensed during the year.

Clean Air Act.

Notifications were received from five premises in accordance with Section 3 of the Clean Air Act relating to the installation of new furnaces. Two were oil fired and three were gas fired.

Noise Nuisance .

Ten complaints have been received of alleged nuisance from noise. This is exactly half the amount received during the previous year. In only two cases was the complaint regarding trade or business premises.

The difficulties in assessing the degree of nuisance caused in many cases is formidable. It is possible if suitable instruments are available to measure the "loudness" of the noise, but this gives little guide to the "annoyance" caused. People who may be oblivious to quite intense industrial noise during the day could find the sound of say a baby crying in an adjoining

house at night quite intolerable, although measurement would show the former was infinitely louder than the latter.

It has been found in the great majority of cases where complaints have been received that the person causing the nuisance has agreed to any reasonable solution, and it has not been necessary to recommend statutory proceedings under the Noise Abatement Act, 1960.

Hairdresser's Premises.

There are 12 ladies' and 5 gentlemen's hairdressers in the town. They are inspected from time to time to ensure that recently adopted Byelaws in respect of these premises are complied with.

Disinfection.

During the year 10 rooms have been disinfected.

Prevention of Damage by Pests Act, 1949.

Four hundred and six infestations, 363 in respect of rats and 43 in respect of mice, were dealt with during the year. In each case visits were paid until the rats or mice were exterminated. In all, 2,122 visits were made.

Permanent baits are maintained at selected points on the Council's tip to ensure that no infestations arise.

A free service is given in respect of private dwelling houses, but charges are made for business premises.

The following table shows statistics in respect of works carried out during the year 1964:-

Amount of Warfarin poison bait used during the year:-
587½ lbs.

No. of properties treated:-

(a) for rats 363 (b) for mice 43.

Class of Property	Rats	Mice
Domestic Property	282	28
Commercial and Industrial Premises ...	70	12
Agricultural Premises	11	3

SANITARY INSPECTION OF THE AREA

During the year inspections have been as follows:-

Public Health Acts

Houses: initial inspections	59
Houses: re-visits	170
Animals, keeping of	19
Drainage inspections and tests	193
Ditches, streams, rivers	22
Infectious disease and disinfection	157
Movable dwellings (other than caravans)	45
Offensive accumulations	35
Dirty and Verminous premises	22
Port Health (ship inspections)	66
Refuse collection and disposal	44
Workplaces	6
Miscellaneous visits	271
Interviews	210
Houseboat inspections	35

There are two Outworkers in the district (wearing apparel).

SECTION D

HOUSING

During the year 41 Council Houses and 189 Private Houses were erected.

The Council made 4 Closing Orders, which only necessitated the re-housing of one man. The Council also cancelled 5 Closing Orders.

The Littlehampton Urban (Nos. 5, 6 and 7 Purbeck Place) Clearance Order, 1964, was confirmed without modification by the Minister.

The passing of the 1964 Housing Act gave new powers and placed new responsibilities on local authorities in relation to Improvement Grants. It is now possible in specified areas known as Improvement Areas for the Council to require the owners of tenanted houses to bring these houses up to the well known "five amenity standard". Inspections of houses in a selected area have been carried out and a report has been presented to the Health Committee.

Waiting List for Housing Accommodation

Total number of applicants on waiting list for houses at 31st December, 1964	...	332
Total number of applications received during 1964	119
Total number of families rehoused during 1964		69

The number rehoused is almost twice the average (35) for the previous 7 years. In spite of this satisfactory increase in rehousing there are a number of families whose need for rehousing is great if the risk of family break-up is to be avoided. An example is a young mother with three children who has to live with her parents whilst her husband lives with his, because there just is not room enough for them all to be together and they cannot find other accommodation.

SECTION E

FOOD HYGIENE

Inspection of Premises

Eight hundred and twenty six visits were made during the year to food premises in the district.

The number of food premises in the district is as follows:-

Restaurants, Cafes, Snack Bars and Canteens	81
Licensed Premises (including shops)	43
Hotels and Guest Houses	100
Grocers and Confectioners	70
Greengrocers	11
Butchers	12
Wet Fish Shops	3
Fried Fish Shops	3
Ice Cream Premises	83
Mobile Vehicles	27
Bakehouses	2

The number of food premises registered under Section 16 of the Food and Drugs Act, 1960 is as follows:-

Sale and Storage of Ice Cream	83
Manufacture of Ice Cream	4
Sale of Prepared Meats and Sausages	16
Fried Fish Shops	3

Inspection of Premises

Where contraventions of the Food Hygiene Regulations are found advice and warnings are given and every effort is made to persuade offenders to comply with the letter and spirit of the Regulations.

In one case it was necessary to institute proceedings in the Magistrates Court where the owner of a Greengrocers shop pleaded guilty to four offences under the above Regulations and was fined a total of £25.

Food and Drugs Act, 1955

The number of complaints by the public of unsound food or foreign bodies in foodstuffs continues to rise. Thirteen such complaints were received and in ten cases the Council authorised the service of warning letters. It was noticeable that during and after the Aberdeen typhoid outbreak a large number of complaints and queries were received regarding the fitness of tinned meat.

Inspections were carried out to check the practise of wholesalers leaving foodstuffs exposed to contamination on the foot-path outside retailers' shops before such shops opened in the morning.

A formal sample of bread and butter sold at a local restaurant showed that the butter was a mixture of 35% butter and 65% margarine. A warning letter was sent to the proprietor.

Milk and Dairies

There are four registered dairies in the district. The number of distributors under the Milk and Dairies Regulations, 1959, is 19.

The number of visits made to dairies and distributors during the year was 27.

Two of the above dairies are pasteurising and boiling plants and as such are licensed by the Food and Drugs authority, which is the West Sussex County Council. Frequent samples of the milk and the empty bottles prior to filling are taken by the County Public Health Inspector who forwards copies of the results of these samples.

Twenty-one samples were taken from the remaining two dairies and all were satisfactory.

Ice Cream Premises

There are 83 premises registered for the sale and storage of ice cream in the district. Four establishments are registered for the manufacture of ice cream.

During the year 43 samples of ice cream were taken and submitted for grading. Twenty-two samples were classified as Grade I, twelve Grade II, seven Grade III and three Grade IV.

Inspection of Food

The following items were inspected during the year and found to be unfit for human consumption:-

36 tins of meat	1 box carrots
108 tins of fruit	1 box lettuce
70 tins of vegetables	2 boxes apples
3,538 other pre-packed articles.	4 cwt. potatoes
27 stone fish	1 box bananas
1 gallon scampi	1 box cabbage
8 doz. scallops	1 box onions
8 lbs. prawns.	
120 lbs. meat	
11 lbs. lard	

SECTION F

PREVALENCE AND CONTROL OF INFECTIOUS DISEASES

Notifiable Diseases

	Under 1 year	1-4	5-9	10-14	15-24	Over 25	Total	Admitted to Hospital
Scarlet Fever ...	-	2	5	-	-	-	7	-

Scarlet Fever	13	12	4	8	16	13	8	5	14	1	7
Poliomyelitis	2	1	1	1	-	-	-	-	-	-	-

The following table shows the decline in notifications of Diphtheria and deaths from the disease since the beginning of the century :-

	1901-10	1911-20	1921-30	1931-40	1941-50	1951-64
No. of cases notified	182	211	89	73	17	0
No. of deaths ...	31	10	6	9	0	0

The last case of Diphtheria was notified in 1949.

TUBERCULOSIS

New Cases and Mortality

One person died from Tuberculosis who had not been notified during life.

Age Period	New Cases				Deaths			
	Pulmonary		Non-Pulmonary		Pulmonary		Non-Pulmonary	
	M.	F.	M.	F.	M.	F.	M.	F.
1	-	-	-	-	-	-	-	-
5	-	-	-	-	-	-	-	-
10	-	-	-	-	-	-	-	-
15	-	-	-	-	-	-	-	-
20	-	-	-	-	-	-	-	-
25	-	-	-	1	-	-	-	-
35	-	-	-	-	-	-	-	-
45	-	-	-	-	2	-	-	-
55	-	-	-	-	-	-	-	-
65 and upwards	-	-	-	-	-	-	-	-
Total ...	-	-	-	1	2	-	-	-

There were 43 cases of Tuberculosis on the register at the end of the year.

There were no cases of the following diseases, which are also notifiable:-

Anthrax	Membranous	Plague
Cholera	Croup	Poliomyelitis
Diphtheria	Meningococcal	Puerperal Pyrexia
Encephalitis	Infection	Relapsing Fever
Enteric Fever	Ophthalmia	Smallpox
Food Poisoning	Neonatorum	Typhus
Malaria	Pneumonia	
	Puerperal Pyrexia	

IMMUNISATION

The following immunisations were carried out during the year:

Diphtheria and Tetanus:

Primary Injections	40
Reinforcing Injections	261

Tripe Antigen:

Primary Injections	312
Reinforcing Injections	269

Poliomyelitis Vaccination

Initial vaccination of two injections or three

doses of oral vaccine	448
Reinforcing procedures	177

Smallpox Vaccination

Primary vaccination	256
Re-vaccination	121

Influenza

The Council offered vaccination against Influenza to its staff. Out of 164, 19 indoor and 28 outdoor accepted the offer and were vaccinated.

METEOROLOGICAL STATISTICS FOR THE YEAR 1964
